

## Who we are?

Shalom InfoTech focuses on helping small businesses start and market their businesses on the Web, enabling them to realize their dreams of self-reliance, entrepreneurship, creativity, and financial independence. We pioneered the service for creating and acquiring specific websites and today offer a full range of Web-related services. We offer the broadest software development capabilities, from design resources to end-to-end support services and provide more value and innovation to customers by leveraging its global economies of scale across a wide range of products. We also serve numerous value-added Information Technology solutions to large and medium-scale organizations in India and abroad.

Our successful market strategy is based on several key competitive differentiators, which include:

- Commitment to Customer Satisfaction
- Segment and Business Unit Strategy
- Vertical Integration Capabilities
- Design Capabilities
- Low Cost, High Quality Services
- Information Technology Strategy and Implementation
- Chief Officers with high reputation in the industry

## Core Values

To Practice...

**Integrity** Do what we say we will do

**Dedication** Strive to be the best we can be

**Readiness** Recognize and react positively to change

In all our relationships...
